

Name \_\_\_\_\_

## The Nature of Science

### Across

2. Information gathered with the senses
3. Process of trying to understand the world
7. Research that answers scientific questions through observation
9. Conclusion drawn from an observation

### Down

1. Statement that can be tested
4. Factor that stays the same through all phases of an experiment
5. Represents something that is too big, too small, too dangerous, too time consuming, or too expensive to observe directly
6. That will be measured in an experiment
8. Variable in an experiment that the experimenter changes
