

Name _____

Designing Bunnycopters

Purpose: To review the components of experimental design.

What to do: given a paper “bunny helicopter” a five paper clips, design a bunnycopter that...

- can land on the target
- can drop a specific height in a specific time (you decide)
- something else? (your choice)

What **independent** variable will you change in this investigation? _____

What **dependent** variable will you measure in this investigation? _____

What are three variables you will **control** in this investigation?

Write a **testable question** for your investigation:

Write a **hypothesis** for your question:

Describe the **procedure** you will use to conduct your investigation:

<p>What materials and supplies do you need to do this investigation?</p>
